If customer wants to register for upgrade, after payment of necessary fees, an email shall be sent to the customer which contains the TOKEN_No for the upgradation. Please note that this token number is like currency. Once used, it can not be consumed again. So keep it confidential till you register your PCUST.DLL with this token.

Once you receive the Token, log-in to the softman site and select Consume Token option under Master Keys. There after, click on the Browse button and select the correct PCUST.DLL that you want to register for upgrades and click on Check.

System shows the details of the PCUST file you selected for upgrade. Verify that it is the same file you want and then input the Token ID (You received from email) into token id box and then press Register button. Please do not double click this button OR refresh the browser ! You may loose the token ! Your browser shall pop-up a download window for downloading the upgraded PCUST.DLL file. Save it at suitable location and then replace the original one with this file. Your upgradation is complete. Once you log-in to PHARTAIL, you can see on the top of the screen the corrected date of registration.
